

Below is an email from the editor of the *EAA Sport Pilot Magazine* --

Hi Bill,

Thought you'd enjoy seeing this nice letter.

I'll use it in the Members Forum section of the July issue of Sport Pilot.

Best ... off on any adventures soon?

Mary

I was truly honored by the comments of Bill Vietti in his article "Build it and they will come" and wish to thank him and all the Powered Parachute Group that came to our town, and more especially I would like to spread the word that if your town is contacted by these wonderful people about staying at your airport, SAY YES.

These are some of the most diverse and inspiational people you will meet, and they spent the time they were nor flying visiting the Town and surrounding area making friends. The mornings they flew people got out to watch the brightly colored canopies speading across the area, calling to find out when it would happen again.

And as for my flight with Garey, it gave new meaning to "low and slow". The enthusiasm and camaraderie around this bunch is contagious so be prepared for a truly wonderful experience.
